

## PRODUCT SPECIFICATION SHEET

## MINI TOWER WORKSTATION

*Affordable, reliable computers, with maximum expandability*

- **High performance**
- **Maximum expandability**
- **Quiet operation**
- **Rugged and reliable**
- **Stylish design**

### IN DETAIL ● ● ●

Where a high performance, affordable computer is required, then the Conquest Wildman Tower Systems are the ideal solution. The mini tower case has maximum room for future expandability, whilst maintaining a stylish appearance, and easy access to all front mounted drives and accessories.

These computers are very robust, and because they are assembled from the highest quality components from market leaders such as Intel, 3com, Seagate, LG, and Pioneer you can expect a reliable system with a long life expectancy.

Primarily used as office PC's, these computers are equally well suited for use in the home, or even in light industrial environments.

***The Conquest Wildman Tower series – Affordable, reliable computers, with maximum expandability.***
